

# How To Apply Granular Inoculants

Make sure you and your customers have a positive experience with these granular inoculants:

**TagTeam<sup>®</sup> BioniQ<sup>®</sup> TagTeam<sup>®</sup> JumpStart<sup>®</sup> Cell-Tech<sup>®</sup>**

## Stop!

Don't just open the bags and go.

## Read!

Always read and follow label directions prior to use.

## Drop!

Drop the bags once on each side to break any lumps that may have developed during shipping or storage.

## Screen!

Screen granular product as it is being poured into the tank to catch any small lumps. Pour, don't auger, as augers can reduce the size of granules.

## Count!

Always consider environmental conditions when loading the granular tanks. Do not fill more than 454 kg (1,000 lbs) or 25 bags per tank. Under humid conditions, consider reducing the volume of granular inoculant loaded into the tank and check flow on a regular basis.

## Clean!

Clean out your tank at night. Do not leave granular inoculants in the tank or seed cart overnight. In humid conditions check and clean metering system regularly to ensure consistent flow.
