

# Taegro<sup>®</sup> 2

Wheat · Fruit · Vegetables

## Product Overview

### Liquid Biofungicide

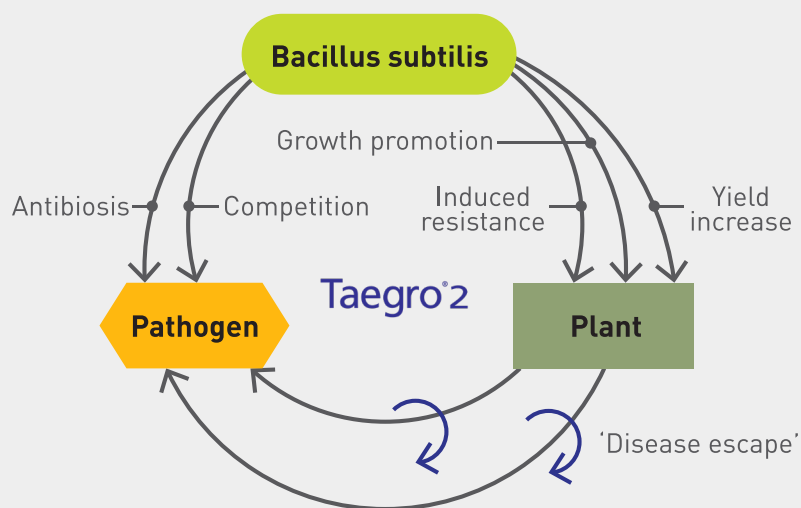

Taegro 2 is a broad-spectrum microbial foliar fungicide for wheat, fruit and vegetables with multiple modes of action. Taegro 2 contains the active ingredient *Bacillus subtilis* var. *amyloliquefaciens* Strain FZB24. It protects against a range of diseases, that include powdery mildew and botrytis. Allowing you to maximize your crop's yield potential.

### Key Benefits At A Glance

- Broad fungicidal activity, proven efficacy.
- 0 days preharvest interval/low preharvest interval.
- No resistance/minimal to no resistance.
- Novel modes of action.
- Multiple modes of action.
- OMRI certification.
- Great tool for IPM (Integrated Pest Management).
- Safe for pollinators/bees.

### How It Works

1. Taegro 2 is formulated with naturally-occurring *Bacillus amyloliquefaciens* bacterium. It provides protection against a wide range of soilborne and foliar pathogens.
2. Taegro 2 is active in a variety of temperature and soil pH conditions. It has no MRL and has compatibility with a variety of pesticides and fertilizers. That means you can use it as part of an Integrated Pest Management (IPM) program. It's a microbial solution with low application rates and short re-entry and preharvest intervals. The result is reduced chemical usage and compliance with various food chain requirements.

## Foliar Wheat Application

- Application Rate: 256 (g/ha).
- Disease Suppressed: Partial suppression of Fusarium head blight (*Fusarium graminearum*).
- Apply Taegro 2 to wheat at early flowering.
- Mix 256 grams of Taegro 2 in at least 187 L of water to treat 1 hectare.
- Follow the general mixing instructions in this booklet to ensure a properly distributed suspension.
- Follow spray equipment manufacturer's instructions to obtain adequate coverage with minimal plant runoff.
- Continue applications at 7-day intervals when conditions are conducive to disease development.
- Taegro 2 must be used in conjunction with IPM practices in order to adequately manage mycotoxin levels in wheat kernels.

*Please read the label before application for complete use instructions.  
For application on specific fruit and vegetables, please refer to product label.*

## Storage Recommendations

- Keep in original container during storage.
- Store product in a dry, well-ventilated place away from seed, feed, fertilizer or other pesticides.
- Keep away from direct sunlight, fire or open flame, or other source of heat.
- Taegro 2 consists of living microbes. Store at temperatures between 4°C and 35°C and use by the expiry date noted on the label.
- Do not freeze. Close opened packages tightly.
