

TagTeam®

FABA BEAN

DUAL ACTION INOCULANT FOR FABA BEAN

TagTeam is a dual action inoculant that provides balanced phosphate and nitrogen nutrition to your crop by combining a specially selected rhizobia with *Penicillium bilaiae*, the active ingredient in JumpStart® inoculant.

Penicillium bilaiae is a naturally occurring soil fungus which grows along plant roots releasing phosphate, making it more available for the crop to use. Phosphate is an important component that drives the needed energy for the nitrogen fixation process.

MORE PHOSPHATE. MORE NITROGEN.

The synergy of the rhizobia bacteria and the soil fungus working together creates more fixed nitrogen and better access to soil and fertilizer phosphate, providing the balanced nutrition necessary to maximize your crop's yield potential.

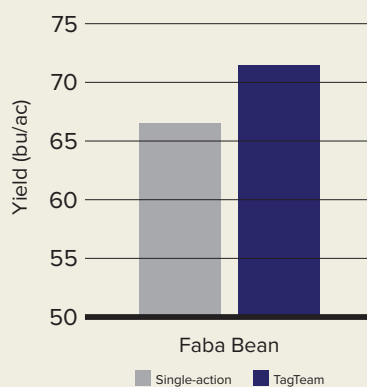

Single-action TagTeam faba bean

BENEFITS OF USING TAGTEAM

- A specially selected rhizobia strain
- Improved nodule formation
- Increased nitrogen fixation
- Improved phosphate availability
- Enhanced nutrient availability to support root and shoot growth

TagTeam helps to increase faba bean yield potential

TAGTEAM GRANULAR APPLICATION

TagTeam granular should be applied directly with the seed in the seed row using a granular tank for application. Application rates vary according to row spacing (refer to table). Please read the label before application for complete use instructions.

- Fill the tank to match or slightly exceed seed requirements. Do not overfill the tank to avoid compaction.
- Pour into tank through a screen.
- If augering TagTeam granular, do so at low speeds to avoid damage to the granules.
- Do not mix TagTeam in the same tank with seed or fertilizer.
- Do not leave TagTeam granular in the tank overnight as condensation can cause lumps to form.

TagTeam granular application rates for 16.5 kg bags

Crop type	Faba Bean	
Row Spacing	ac/bag	lb/ac
6 in	6.6	5.5
7 in	7.7	4.7
8 in	8.8	4.1
9 in	10.1	3.6
10 in	11.0	3.3
12 in	13.4	2.7
15 in	16.5	2.2

If you need more information or have questions about how to maximize yield potential with TagTeam, contact Monsanto BioAg toll-free at **1-800-667-4944** or visit **Monsantobioag.ca**.

ALWAYS READ AND FOLLOW LABEL DIRECTIONS. Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.
