

# DRIVE-N™

## For Anhydrous Ammonia

### Nitrogen Stabilizer

Apply Anhydrous Ammonia (NH<sub>3</sub>) with the peace of mind that nitrogen will be there when your crop needs it in the spring.

#### Active Ingredients:

- DCD 34%

#### Protection From:

- Denitrification
- Leaching

#### Features:

- Protection of nitrogen from potential losses.
- With 34% DCD, Drive-N helps keep nitrogen in the NH<sub>4</sub><sup>+</sup> (Ammonium) stable form for longer vs untreated Anhydrous Ammonia.
- Non-corrosive and non-staining formulation for NH<sub>3</sub> (Ammonia) components.
- Application rate of 14 L/MT of NH<sub>3</sub>.

### Benefits of NexusBioAg's Nitrogen Stabilizers

- Select the right stabilizer to protect nitrogen against loss.
- Take advantage of fall applications of nitrogen.
- Insure that your plants have available nitrogen longer into the growing season for optimal yields and protein.
- Using a stabilizer is great insurance to protect your valuable nitrogen investment.
- We can't predict what the growing season will bring, hedge your investment with the proper nitrogen stabilizer.
