

## YieldMax WS

18-20-20

N (18)- P (20)- K (20)

B (0.08%) Cu (0.15%) Mn (0.1%) Mo (0.0005%) Zn (0.1%)

**Complete package of macro and micronutrients which are essential building blocks to maximize yield potential.**

- Feed the need with a foliar application of YieldMax WS.
- Flexible foliar application, compatible with crop protection products, with other fertilizers or can be applied alone.
- May be applied by ground sprayer, airplane or overhead sprinklers.
- Use rates vary from 2 lbs to 5 lbs/acre, depending on the level of nutrient deficiency.

**B**

BORON

- Main function is for plant cell division (growth) in the early stages.
- High requirements for reproductive growth during pollination and seed set.

**Cu**

COPPER

- Essential for standability and metabolism of carbohydrates and proteins.
- Required for respiration within the plant.

**Mn**

MANGANESE

- Highly involved in nitrogen uptake.
- Critical role in chlorophyll synthesis with nitrogen.
- Enzyme activator.
- Vital to photosynthesis operation within the plant.

**Mo**

MOLYBDENUM

- To convert unusable nitrogen forms to plant available forms.
- Required for nitrogen fixation in pulses.

**Zn**

ZINC

- Critical for early growth at internode elongation.
- High requirement during seed development and formation.
