

K-MAG[®] PREMIUM

0-0-21.5

Specialty fertilizer

K₂O (21.5%) Mg (11%) S (21%)

Particle size: Size Guide Number (SGN) - 260

K-Mag Premium 0-0-21.5 supplies both an initial amount of magnesium for immediate needs and additional magnesium for soil buildup and extended plant needs.

- A homogeneous product of potash, sulphate sulphur, and magnesium with a low analysis of magnesium sulphate to insure a better distribution throughout the fertilizer blend and in the field.
- 100% water soluble to provide excellent plant availability and compatibility with all fertilizer blends.

Application:

- General recommendations: Use 9 lbs of K-Mag Premium for every pound of magnesium required to meet needs. Application is generally 5 to 10 lbs of actual magnesium per acre. This would be 45 to 90 lbs of product. Apply in the seed row or in close proximity to the seed row.
- Handling and blending considerations: Normal bulk blending procedures. Use K-Mag Premium to match analysis where higher amounts of magnesium are needed.
